Locality	Kallnach
Country	Switzerland

Custom-made concept

The chicken farming hall in Kallnach was built in a very short space of time. This was despite the large-scale dimensions (67 m in length and 25 m in width), which yield a usable stall area of 1,200 m2. The covering is made from sandwich panels and is clad with a pressure-treated formwork in spruce. Our partner Globogal AG planned and implemented the custom-made concept for the barn equipment.
