Construction	2007
Locality	Urnäsch
Country	Switzerland

Holidays in the idyllic Swiss countryside

The holiday village comprises four single-storey shared houses that blend seamlessly into the environment and include a reception, a space for children and teens, a TV room, an event room, a library and shared kitchens. The three two-storey residential buildings are shielded from the road by the shared building. The buildings are made of Swiss fir and spruce wood element construction and are Minergie-ECO certified. The ceiling constructions are fitted with Lignatur ceiling elements.
